INTRODUCTION TO SHIMRIN2® TECHNOLOGY

HOUSE OF KOLOR CLASSICS

SPECIAL NOTE: The Shimrin2® Digital Kolor Shapes on pages 1 - 14 are labeled with their respective formula number and foundation color.

The number in the upper right corner of each shape is the formula number. These formula numbers correspond to House of Kolor's online formula retrieval system found under Shirmin2 tab of the landing page (home page). When viewing online, the number in the upper right corner of each shape is the formula number, preceded by an "HOK-" prefix. The formula number also indicates what components are mixed to create Shimrin2® Kolor Trend.

1547

KD3000

Four Digit Formula Number - Basecoats  
First two digits represent the S2 FX Karrier Base - example show = S2-15 Solarflair Red  
Last two digits represent the S2 FX Effect Pac – example shown = S2-FX47 Metajuls Silver FX  
Standard Formula Note: Mix 3 parts FX Karrier Base to 1 part FX Effect (3:1)  
NOTE: when applying effects (S2-00 with S2-FX21-26, 41-47, 31-39, 51-56, and 61-67) please see optional mixing recommendations on page 17-18.

001632

KD3001

Six Digit Formula Number - Kandy Basecoats (KBC)  
First two digits represent S2-00 Trans Nebulea FX Karrier Base  
Middle two digits represent Kandy Koncentrate (KK) – example shown = KK16 Magenta  
Last two digits represent S2 FX Effect Pac – example shown = S2-FX32 KSP Red FX  
Standard KBC Formula Note: Mix 8 parts S2-00 to 1 part KK to ½ part FX Effect (8:1:1/2)

Online Kwik-Mix

The number in the bottom left corner of each shape represents the Shimrin2® Basecoat or KD3000 Series formula number.

The Digital Kolor Shapes are photographed painted shapes and are close representations to the actual color. We recommend painting and using test panels for a more accurate final color match.

The Digital Kolor Shapes represent a sample of our color offering. They are for color reference only, and not intended to show limitation to the product line. Additional color combinations are easily achievable with House of Kolor, and the possibilities are virtually endless.

Step 3	COLOR	Shimrin2® basecoats are solvent-borne, ultra productive, easy to apply, lower VOC than Water based systems. Shimrin2® Basecoats will have your eyes popping with extreme depth and clarity, Kandy-like micro ground pigments, and unlimited spectrum of color and effects Shimrin2® is the Future of Kustom painting available now, compliant throughout the USA including California.	<b>Begin by selecting Shimrin2® Basecoat kolors for your project. Thousands of Kustom Kolor Trends can be viewed online, at local Jobbers supporting the Kustom Kolor Trend mini kolor wall, and new kolor tools soon to be released</b>					
			Often described as "looks a mile deep", all Shimrin2® base coats are semi-translucent. It is critical the vehicle or substrate is ground coated with one even color. An excellent ground coat is <b>KD3000 DTS Foundation Surfacer Sealers</b> or <b>SS01 Silver Sealer</b> . The color of the ground coat will affect the appearance of the base coat. Take the guess work out of selecting the right color sealer, use HOK1052015 Color Check Panel. A must have color tool. This innovative spray-out panel consists of sixty-two KD3000 series color variations. Color styling has never been easier or faster. Simply apply basecoat over panel to achieve an instant library of colors and effects. Select a foundation Kolor that fits your desired topcoat Kolor and begin sealing your project.					
			Sealing	For Shimrin2® basecoat kolors containing S2-01 - S2-16 FX Karrier Bases, use selected <b>KD3000 series</b> kolor mixed as sealer.				
			For Shimrin2® basecoat kolors containing S2-00 Karrier Base and FX Effect Pacs FX-03 , FX-04, and FX-05 use <b>SS01 Silver Sealer</b> .					
			Standard Basecoat	Standard basecoats are a combination of 17 different FX Karrier Bases (S2-00 through S2-16) and 40 different <b>FX Effect Pacs</b> (S2-FX01 through S2-FX67). Supported by Kwik-Mix, Kolors and Formulas available online.				
			Standard Kandy Basecoat (KBC)	Standard Kandy basecoats (KBC) are a combination <b>S2-00 Trans Nebulae</b> FX Karrier Base, <b>Kandy Koncentrates</b> (KK) and 40 different <b>FX Effect Pacs</b> (S2-FX01 through S2-FX67). Supported by Kwik-Mix, Kolors and Formulas available online.				
Kustom Kreator Basecoat		Your only limitation is your imagination with Shimrin2®. Kreate your own Kustom Kreator Kolors. All Shimrin2® components are intermixable. Combine multiple Karrier Bases and FX Effect Pacs. It is recommended that your creation maintains the standard loading of 3 part FX Karrier Bases, 1 FX Effect Pacs to ensure ease of application. When Kustom Kreating Kandy Basecoats (KBC), the recommended standard loading is 8 parts of a combination of Karrier bases. 1 part of a combination of Kandy Koncentrates, and 1/2 part of a combination of FX Effect Pacs.						
Step 4	CLEAR	USC01 Urethane Show Klear has three times the UV blocking capability compared to standard automotive clear products. USC01 Is a medium solids Klear offering users excellent flow out, gloss, D.O.I. (Distinctness of Image). USC01 can be used on all size projects, resulting in the show-ready finish that House of Kolor users crave.	<b>Finish your project with a premium Klear</b>					
			Topcoat UV Protective Klearcoat	<b>USC01 Urethane Show Klear</b> Is a medium solids Klear offering users excellent flow out, gloss, D.O.I. (Distinctness of Image), excellent chemical and fuel resistance, as well as the highest UV protection in the industry.				
			<b>Finish your project with a Kandy</b>					
			Topcoat Urethane Kandy Finish	<b>UKK01 Urethane Kandy Karrier</b> brings simplicity to a historically difficult finish. UKK01 combines robust resin chemistry with rich Kandy Koncentrates (KK) delivering a Kandy system that applies easily in both a low solids and medium solids version. <b>USC01 Urethane Show Klear</b> must be applied over UKK01 Kandy's.				
			Cut, Buff, and Polishing	<b>USC01 Urethane Show Klear</b> delivers premium show room results. If nessesary, USC01 Urethane Show Klear cuts, buffs, and polishes easily after 24 hours.				

See New Product Mixing Chart on page 17-18. Please refer to individual product technical data sheets for complete information on mixing, application, and important notes. Technical Data sheets may be downloaded at [www.houseofkolor.com](http://www.houseofkolor.com).

# HOUSE of KOLOR SHIMRIN2® PREMIUM CUSTOM FINISHES SINCE 1956

Shimrin2® is the 2<sup>nd</sup> generation of the proven Shimrin® Basecoat technology introduced in 1982. Shimrin2® is the next generation of robust ground-breaking universal basecoats from House of Kolor. Through new polymers and innovative chemistry we are able to meet and exceed waterborne with a solvent based system and allow you the painter to create hundreds of easy to mix and use colors that are the most exciting, from the latest pearl technology. Shimrin2® basecoats are ultra productive, easy to apply, and range from Metallic Basecoats (BC), Pearl Basecoats (PBC), and Kandy Basecoats (KBC). Shimrin2® Basecoats are a three component system that consists of our S2 FX Karrier Bases, S2-FX Effect Pacs and RU Series Kosmic reducers. This New System is the Future of kustom painting available now, compliant through out the USA including California.

## SOLID BASECOAT

House of Kolor has stepped up its game with the introduction of the Shimrin2® S2-25 and S2-26 Solid Basecoats. With a blacker Jet Black and whiter Bright White, The Best just got Better. Color outside the lines, add FX Effect pacs for that extra bling!

Shimrin2® Solid Basecoats

S2-25 Jet Black

S2-26 Bright White

## FX KARRIER BASE

S2-00 Trans Nebulae is the beginning of all Shimrin2® effects, making it the heart of the Shimrin2® product system. This diverse component of the S2 FX Karrier Base Series is used to create straight effects with no pigment, KBC Kandy Basecoats, tri-stage coats, and much more. Color styling is a breeze with S2 FX Karrier Bases S2-01 through S2-16. From classic favorites like Galaxy Gray, Solar Gold, and Planet Green to new trend setting colors like Eclipse Orange, Solar Flare Red, Lunar Yellow, and Mayan Magenta. These new FX Karrier Bases will have your jaws dropping with extreme clarity, Kandy-like micro grind of pigments, and full spectrum of color attributed to advanced manufacturing techniques, innovative chemistry, and robust polymer engineering.

PREMIUM CUSTOM FINISHES SINCE 1956

## FX METAJULS

House of Kolor proudly introduces the next generation of our highly popular Metajuls<sup>®</sup> MBC Series in the Shimrin2<sup>®</sup> system. Shimrin2<sup>®</sup> FX Metajuls<sup>®</sup> Series feature more colors than ever in an easy to use system. If you want a metal flake look without the intense labor normally associated with flakes, the FX Metajuls<sup>®</sup> will blow your mind!

### Shimrin2<sup>®</sup> FX Metajuls<sup>®</sup> Series

- S2-FX41 Metajuls - MBC Prism FX
- S2-FX42 Metajuls - MBC Pale Gold FX
- S2-FX43 Metajuls - MBC Red FX
- S2-FX44 Metajuls - MBC Blue FX
- S2-FX45 Metajuls - MBC Yellow FX
- S2-FX46 Metajuls - MBC Green FX
- S2-FX47 Metajuls - MBC Silver FX

## FX KOSMATIC STYLING PEARL

Shimrin2<sup>®</sup> FX Kosmatic Styling Pearls are as tough as their namesake, House of Kolor Founder Jon Kosmoski. These are the latest in Pearl technology with tinting strength never seen before in any Pearl pigment, and the color flop direction is like nothing you've ever seen. Ride in style with the FX Kosmatic Styling Pearls!

### Shimrin2<sup>®</sup> FX Kosmatic Styling Pearl<sup>®</sup> Series

- S2-FX31 Kosmatic Styling Pearl - KSP Strikngold FX
- S2-FX32 Kosmatic Styling Pearl - KSP Red FX
- S2-FX33 Kosmatic Styling Pearl - KSP Violet FX
- S2-FX34 Kosmatic Styling Pearl - KSP Blue FX
- S2-FX35 Kosmatic Styling Pearl - KSP Green FX
- S2-FX36 Kosmatic Styling Pearl - KSP Turquoise FX
- S2-FX37 Kosmatic Styling Pearl - KSP Magenta FX
- S2-FX38 Kosmatic Styling Pearl - KSP Indigo FX
- S2-FX39 Kosmatic Styling Pearl - KSP White FX

## SHIMRIN2<sup>®</sup> FX EFFECTS PACS

## FX KAMELEON

House of Kolor changed the face of the kustom paint industry with our revolutionary Kameleon<sup>®</sup> colors and pearls. We've done it again with the new Shimrin2<sup>®</sup> FX Kameleon<sup>®</sup> Series. Do you want colors that change as you move around your vehicle? Amazing effects are yours with an increased palette of colors. You set the tone with Shimrin2<sup>®</sup> FX Kameleons, whether you want subtle or dynamic color shifts.

### Shimrin2<sup>®</sup> FX Kameleon<sup>®</sup> Series

- S2-FX51 Kameleon - KPF Green to Blue FX
- S2-FX52 Kameleon - KPF Gold to Green FX
- S2-FX53 Kameleon - KPF Copper Red to Green FX
- S2-FX54 Kameleon - KPF Sapphire FX
- S2-FX55 Kameleon - KPF Aquarius FX
- S2-FX56 Kameleon - KPF Mayan Eruption FX

## FX KOSMIC SPARK

Prepare to be floored by our new Shimrin2<sup>®</sup> FX Kosmic Spark<sup>®</sup> Series. These pearls are by far the most brilliant pearls viewed in the Sun ever developed. Kosmic Sparks offer you the whitest White pearl possible, and a spectrum of colors to expand your palette. FX Kosmic Sparks are the same platelet size as other pearls, but twice as brilliant!

### Shimrin2<sup>®</sup> FX Kosmic Sparks<sup>®</sup> Series

- S2-FX61 Kosmic Sparks - KDP Sno White FX
- S2-FX62 Kosmic Sparks - KDP Gold Rush FX
- S2-FX63 Kosmic Sparks - KDP Blushing Red FX
- S2-FX64 Kosmic Sparks - KDP Copper Penny FX
- S2-FX65 Kosmic Sparks - KDP Summertime Green FX
- S2-FX66 Kosmic Sparks - KDP Ocean Blue FX
- S2-FX67 Kosmic Sparks - KDP Turquoise FX

# KD3000 SERIES KUSTOM DTS FOUNDATION SURFACER/SEALERS

## What are the KD3000 Series Kustom DTS Foundation Surfacers/Sealers?

The foundation put under anything , a house, a sky scraper or a paint job is incredibly important. KD3000 Series Kustom DTS (Direct to Substrate) Foundation Surfacers/Sealer is a tri purpose product that can be used as a high or medium build primer surfacer, or as a sealer. It is formulated with a hybrid of epoxy and acrylic polymers, which provide excellent adhesion and corrosion resistance, productive dry times, and ease of sanding. These DTS surfacer/sealers emit very low amounts of Volatile Organic Compounds (VOCs), Hazardous Air Polluting Solvents (HAPS), and contain no isocyanates. The KD3000 Series DTS surfacer/sealers may be applied to the existing OEM finish, bare steel, aluminum, fiberglass, galvanized surfaces, and various plastics. Its tenacious adhesion, hi-build, excellent durability, and water and corrosion resistance and ease of sanding makes it a superior choice for the basis of a long lasting custom paint job.

KD3000 Series Kustom DTS Foundation Surfacers/Sealers:

- Resist cracking
- Direct to Substrate (DTS) eliminates the need for the additional steps and products required to achieve optimal adhesion and corrosion resistance.
- Cure as HB Surfacers for contour sanding in under 2 hours at 70°F
- Cure as Sealers for topcoating in under 30 minutes at 70°F
- Prevent plastic filler staining or bleed through
- Multiple colors greatly improves speed and accuracy of contour sanding when used as MB or MB Surfacers
- Application smoothness greatly reduces surface prep and consumption of abrasives
- Do not stain, shrink, or swell from sand scratches

The formula mixes below the KD3000 Kustom Mix swatches shows are listed in parts per volume only, and do not include activator or reducer selection. For complete formula retrieval information, please visit our website ([www.houseofkolor.com](http://www.houseofkolor.com)).

Online Kwik-Mix

**NOTE:** The KD3000 Series Kustom Mix and Kustom Kombination swatches above represent a small sample of color options. You may mix KD3000 Series factory pack colors together to create an unlimited color palette. Create your own Kustom Kreator mixes to eliminate your competition!

## 1.7M MIXING MACHINE KITS

The Shimrin2® Machine kits accurately mix and store the most technologically advanced custom paint system on the market. Available in multiple configurations to better fit your space and mixing requirements.

Unleash your creative side and expand your color palette with these convenient Shimrin2® intermix systems!

**Note:** By design, Mixing Equipment is not required for mixing Shimrin2®. A minimal investment of lids and manual crank handle for FX Karrier Bases is all that is required to mix small amounts and/or Kustom Kreations and Klassic Kolors.

**Part# S2MK6**  
Includes two optional side storage cabinets  
1.7M Dimensions: Premium: 95" W x 67" H x 18" D  
35 Quart mixing locations

**Part# S2MK3**  
Includes two optional side storage cabinets  
1.2M Dimensions: Premium: 77" W x 67" H x 18" D  
23 Quart mixing locations

**Part# S2MK5**  
Dimensions: 81" W x 67" H x 18" D

**Part# S2MK4**  
Basic: 67" W x 67" H x 18" D

**Part# S2MK2**  
Dimensions: 63" W x 67" H x 18" D

**Part# S2MK1**  
Dimensions: 49" W x 67" H x 18" D

## MIXING EQUIPMENT & ACCESSORIES

Quart Part# S2E09

Gallon Part# S2E10

Alliance ClicSeal Mixing Lids are ten times stronger than traditional lock-lever mixing lids. A gasket seals on the inner diameter of the can, reducing evaporation. Alliance ClicSeal Mixing Lids are available in both quart/1 liter and gallon/3.5 liter sizes.

Part# S2E11 - Our crank handle can be used to manually mix paint by hand. It attaches to gear adaptors, fork adaptors, or directly to the paddle drive shaft.

Part# S2E13 - The Blending Table includes a drawer and an adjustable bottom shelf. 37" W x 31" H x 21" D

Part# S2E16 - The Wall Cabinet requires no assembly and is excellent for storing your equipment. It includes two adjustable galvanized shelves. 35" W x 30" H x 9" D. A spray gun holder is also available. (Part# S2E17)

Part# S2E12 - The Panda Scale is designed to meet the requirements of refinish applications. It can weigh to the nearest tenth of a gram and can be connected to a computerized paint mixing system. The Delta Range function increases the readability to 0.05 g in the 0-1000 g range. Weighing capacity is up to 7 Kilograms. 10" W x 14" H x 11" D

Part# S2E14 - Shake things up! The Cyclone Air Shaker is proven to be the most reliable shaker in the world. It can accommodate half liter through gallon, aerosol, and rectangular cans.

Part# S2E15 - The optional pedestal (shown) can be secured to the floor with bolts.

### KKT01 - SHIMRIN2® KUSTOM KOLOR TRENDS MINI COLOR WALL

You've seen it on the set of SPEED® Channel's "Car Warriors" - now is your chance to own one of our new KKT01 Kustom Kolor Trends Mini Color Wall.

The first in a series of modular color walls, this massive display board measures 43.5 inches tall x 26 inches wide and holds 100 different painted Shimrin2 speed shapes. Show off the latest Shimrin2 Kustom Kolor trends to and your customers will beat a path to your door.

Stay tuned for additional releases of eye bulging color trends!

### House of Kolor Mixing Cups

Be sure that your Shimrin2® Kustom Kolor is accurately mixed with House of Kolor's new mixing cups. These sturdy, reusable cups are easy to read, ensuring you'll never waste another ounce of paint. House of Kolor mixing cups are available in two sizes: 2.5 Quart (Part# HOK1153055) and 1 Pint (Part# HOK1153050).

## MATERIAL ORDERING GUIDE

Approximate materials needed for a complete paint job.

Quantities may vary from painter to painter and articles to be sprayed, etc. This chart is an approximate only.

Since 1956, House of Kolor has been designed for use as a complete kustom system. From Primers to Klear Koat, the beauty and longevity of a House of Kolor paint job comes from using every component as a complete system. House of Kolor recommends saving receipts or invoices from your paint order, and recording the batch code on the receipt for future reference. This will help insure you get the right mix, should you need to touch-up your paint job.

# PREPARATION & CLEANING

## WAX & GREASE REMOVER (KC10)

- Removes grease, wax, silicone, adhesives, tar, tree sap, insects and dirt.
- Quick flashing solvent designed for use over existing finishes and bear metal before sanding and body work.

## POST SANDING CLEANER (KC20)

- Removes sanding residue as well as dirt and light contaminants, such as hand oil.
- Eliminates static electricity that occurs during the working of substrates
- Designed for use after KC10 and after sanding.

# WHY USE KUSTOM PRIMERS & SEALERS

The primer is the foundation of any custom paint job. Because of the unique chemistry of our epoxies, our primers offer:

- Direct to metal, plastics, and fiberglass.
- Extreme flexibility that allows the finish to expand and contract when the metal is heated or cooled, and will not crack even when seriously dented.
- Tenacious adhesion that resists chipping from rock bruising or door dings.
- Fills up to 24 P grit scratches and offers outstanding sandability.
- Complete blockage of body filler bleed-through at 2 mils of film build.
- Very high film build and easy sanding to improve productivity.

## KWIKURE 2-PART EPOXY PRIMER/SURFACER (KP2CF PARTS A & B)

- Designed to work over properly prepared bare aluminum, fiberglass, galvanized steel, OEM finishes and some woods and plastics.
- 2 coats cover 24 P grit scratches; 70% solid high build primer that remains extremely flexible
- The easiest to sand prime available, wet or dry.
- Body filler can be applied under or over primer.

## DIRECT TO METAL PRIMER (KD2000 & KDA2000)

- Low VOC Direct to Metal Epoxy
- Designed to be applied to properly cleaned and sanded aluminum, steel, galvanized steel, OEM finishes, sand blasted steel, fiberglass and SMC.
- Tenacious adhesion to bare substrates.
- Quicker Flash and dry times than KP2CF

## KO-SEAL® II PRIMER SEALER (KS SERIES)

- Improve the adhesion between the substrate and the base coat.
- Greatly improve the color holdout of your finish.
- Tintable to reduce the amount of base needed to achieve full coverage or even can be used as ground coats in some applications.
- Prevent solvent absorption into the primer.

In custom painting, sealers will save you time and money, and should never be considered OPTIONAL! They perform four critical functions:

- Improve the adhesion between the substrate and the base coat.
- Greatly improve the color holdout of your finish.
- Tintable to reduce the amount of base needed to achieve full coverage
- Prevent solvent absorption into the primer.

# SHIMRIN® UNIVERSAL BASES

## GRAPHIC KOLORS (SG SERIES)

**‘The bright building block for your flawless paint job’**

Graphic Kolors are the high-performance solid color range in the House of Kolor line-up. Featuring intense clean color & great coverage – this product is created purely of 100% organic pigment. Mainly used as ground coats, but can be applied also as a top coat for those looking for a powerful burst of solid color. Available in 13 unique base coat colors to satisfy your creative needs!

- Feature fast coverage, high pigmentation and low solids
- Universal basecoat that may be simply cleared for a final finish or used as a basecoat with other Kandys or Pearls in the HOK range.
- Can be top coated with either acrylic lacquer or urethane enamel
- Designed to reduce paint build up

## DESIGNER PEARLS (PBC SERIES)

**‘Crisp clean pearls from any angle’**

Designer Pearls come in the widest palette on the market - 35 pearl colors in the range. Color possibilities become endless, as Designer Pearls may be intermixed with other Shimrin’s including the Neons, Graphic Kolors BC & FBC Metallic Basecoats and Kandy Basecoats to create a truly one-of-a-kind custom finish. Simple to apply with premium results achieved when Designer Pearls are applied over a white or tinted base coat to create an intense pearl effect. Pearl mica pigments are extremely finely ground to create an optimal smooth finish. This also offers excellent usage for air brushers due to a low film build.

- Endless color possibilities – may be intermixed with other Shimrin’s including the Neons, Graphic Kolors & FB or FBC Metallic Basecoats.
- Clean flip from all angles
- Universal basecoat that may be simply cleared for a final finish or used as a basecoat with other Kandys or other effects from the HOK range.

## KANDY BASECOATS (KBC SERIES)

**‘Outstanding color at every stage of your project!’**

This is a specially developed basecoat that mimics the ever popular Kandy finish. Easy to use with a low film build, makes this basecoat suitable for street riders, especially being touch up friendly. Available in the same great 17 colors as Urethane Kandy’s to produce limitless variations of color combinations.

- Feature fast coverage, high pigmentation and low solids
- Application is reasonably simple and ability to touch up if required
- Universal basecoat that may be simply cleared for a final finish or used as a basecoat with other Kandys or Pearls in the HOK range.

## GLAMOUR & FINE METALLIC (BC & FBC SERIES)

**‘Versatile platform product that creates a world of endless color’**

Shimrin Metallic color bases have a captivatingly rich color. Versatile in that they can be used as basecoats beneath a Kandy application or simply clear over the top for a vibrant metallic finish. From this metallic platform color possibilities become endless, as Shimrin Metallic Bases may be intermixed with other Shimrin’s including the Neons, Graphic Kolors and Designer Pearls to create a truly one-of-a-kind custom finish. All 12 colors are available in both fine & coarse grades to give you even more opportunity to create your own unique finish.

- Endless color possibilities – may be intermixed with other Shimrin’s including the Neons, Graphic Kolors & Designer Pearls.
- Universal basecoat that may be simply cleared for a final finish or used as a basecoat with other Kandy’s
- Simple application, good lay down, mottle free finish

## NEONS (NE SERIES)

**‘Eye-grabbing graphic impact’**

Shimrin Neons are designed for hard-hitting high visual impact. Perfect for highlights on race cars, boats and signage where eye-catching intensity is craved. We recommend clear coating with our HOK Urethane clear which contains much more UV absorbers than other standard clears – thus reducing possible sun fade.

- Shimrin Neons have a limited color fastness in the direct sun, so an overall project in Neon is not recommended.
- Universal basecoat that may be simply cleared for a final finish or in graphics and artwork

Refer to the Technical Manual or Technical Data CD for a detailed explanation of products and application.

## SHIMRIN® UNIVERSAL BASES

### METAJULS® METALLIC BASES (MBC SERIES)

**'Exceptional sparkle & brightness'**

Shimrin Metajuls Metallic Bases are our most brilliant metallic basecoats that feature exceptional sparkle & brightness. You haven't seen sparkle until you get your hands on Metajuls Metallics! Used alone they are spectacular, but when teamed with Kandys – they really become magic! Add a complete new dimension to your project by working with Metajuls under our enormous palette of Kandys. Metajuls Metallic bases may also be intermixed with other Shimrin's including the Neons, Graphic Kolors and Designer Pearls making color possibilities endless! Available in Pale Gold (MBC01) and Prism Effect (MBC04).

- Endless color possibilities – may be intermixed with other Shimrin's including the Neons, Graphic Kolors, Kandy Koncentrates & Designer Pearls.
- Universal basecoat that may be simply cleared for a final finish or used as a basecoat with other Urethane Kandy's
- Exceptional sparkle that doesn't require multi-clear layers

### KAMELEON® KOLORS (KF SERIES)

**'Revolutionary head-turner'**

Kameleon Kolor is a revolutionary base coat that has advanced the world of color. Kameleon will actually change color depending on what angle it is viewed. Rounded, curved surfaces & sharp angles will be highlighted by this unique formulation. Color changes are broad too – from a medium green to a deep purple simply by moving your viewpoint a few feet. Available in 7 captivating color combinations.

- Can be mixed with other PBC, KBC & Basecoats to give you a one off exotic finish
- Great for graphics and artwork

## ARTISTIC BASES

### KOSMIC KROME® (MC SERIES)

**'Hard hitting metal look'**

The Kosmic Krome effect has evolved from the development of revolutionary aluminum flake chemistry. The final result can be a beautiful and interesting finish that when combined with other HOK products transforms into an entirely different realm. Brushed aluminum effect can be applied to create a real metal finish – even on wood or plastic! Ideal for detailing of interior parts and available in 5 metal color effects.

- Finished Kosmic Krome surfaces must be clear coated – with either urethane enamel or acrylic lacquer
- Unlimited options when topcoated with Kandys for a anodized look

### MARBLIZER® (MB SERIES)

**'Creating out of this world finish with ease'**

Marblizer Artistic Bases offer you an exciting new paint finish – adding incredible new visual depths to your project. This unique coating can create a wide range of effects – from a deep marble grain to snakeskin appearance. Available in 6 versatile colors – however can be over coated with Kandy's to create any color you wish with an intensely powerful effect.

- An unlimited world of effects are open to the innovative painter
- Use 2 colors together to intensify the effect even further!
- Universal basecoat that may be simply cleared for a final finish or used as a basecoat under Kandy's

## KOSMIC KOLOR® URETHANES

### KOSMIC KOLOR® URETHANE KANDY'S (UK SERIES)

**'The True Kandy effect – the first and the original Urethane Kandy'**

Watch this color explode off the panel taking your project to a dramatic new level. Being transparent enables limitless color possibilities – magnifying any base coat or flake that it is placed over. Our Kosmic Kolor Kandy is incomparable to any other Kandy on the market – no one can match our color intensity or durability! It will also stand the test of time as development has lead our Urethane Kandy to be truly fade resistant. Available in an extensive range of 17 unique colors.

- Can be sprayed over the variety of Shimrin's Bases including the Neons, Graphic Kolors, Kandy Basecoats, Designer Pearls & numerous flakes
- Use only Kosmic Reducers & catalyst with Kosmic Kandy's to ensure longevity

### KOSMIC KOLOR® URETHANE SOLID COLORS (UB & UFB SERIES)

**'Simply urethane single stage'**

- Single stage urethane that can be flattened with FA01 for a great hot rod black
- Available in black and red only

## KANDY KONCENTRATES INTENSIFIERS KANDY KONCENTRATES (KK SERIES)

**'For those that just can't get enough color'**

This specially designed product is solely for intensifying color. If you are a color junkie and just can't get enough, try adding a color boost to our Kandy's range. Speed up your spray process by tinting your bases and sealer. Strengthen Kandy's for faster coverage on chassis, undercarriage, door jambs, engine bays, etc. Kandy Koncentrates will get you through the tough stuff fast by, saving time & material. Also a great product for airbrushing.

- Create a truly exotic color by adding Koncentrate to one of our standard Kandy colors – giving you ultimate creative control!
- Perfect for motorcycles or small parts when speed is a factor
- Great to use for touch-ups and blending

## TOPCOAT KLEARS

### KOSMIC ACRYLIC URETHANE KLEAR (UC35)

- May be used to topcoat any Urethane enamel finish, including all Shimrin Base coats
- Dries fast and may be color sanded and buffed the next day
- Our preferred clear for first coat before flow coating
- Preferred clear for motorcycles due to high acrylic content enabling faster cure time and better resistance to fuel spills

### KOSMIC URETHANE FLO-KLEAR (UFC35)

- Our premium clearcoat for that elite show car finish
- Ultra high gloss consistently used for the top show cars world wide
- Excellent flow out suitable for flow coating and over graphics and artwork
- Good chemical, water and stone-bruise resistance

### KOSMIC ACRYLIC URETHANE KUSTOM KLEAR (UCC01)

- One of our newer clears for people looking for a faster curing product
- May be used to topcoat any Urethane enamel finish, including all Shimrin Base coats
- Tough clear coat, has ultra wet gloss, is resistant to gas spills and most racing fuels
- Contains sunscreen agents to preserve color below
- Dries fast & can be buffed the following day

# INTERCOAT CLEARS

## INTERCOAT CLEAR (SG100)

- Custom painters best friend
- Designed as a protective immediate clearcoat for artwork tapeouts on Shimrin Base Coats
- Prevents tape from marking or disorienting the metallic and splitting when topcoated
- Carrier for smaller flakes and pearls

## INTERCOAT BARRIER CLEAR (USG100)

- Two-component acrylic urethane base intercoat clear that was designed to offer protection if a light solvent wipe is required, when used for artistic effects
- With the application of 2 medium coats, USG100 will typical cure in 3 to 4 hours (depending upon shop conditions) and is ready for sanding, tape outs, and the application of artwork and pinstripes.

## INTERCOAT PEARL & FLAKE KARRIER (SG150)

- Base coat clear that is designed to be used as a carrier for Pearls, Flakes, as well as other dry products offered in HOK range
- Greatly reduces the settling of Pearls and Flakes after the products are mixed
- Encapsulates the Pearl & Flake particles, so when sprayed the particles are self orientated & locked into place – reducing blotching & streaking in the finish

# KUSTOM CATALYST, REDUCERS & THINNERS

## CATALYST (KU100)

This product is for use only in our UK Kandys, UB & UFB products. Due to its unique chemistry, KU100 should never be substituted with other brand catalysts.

## EXEMPT CATALYST (KU150)

This product is for use only In our Ko-Seal® II, UC & UFC Klears. Due to its unique chemistry, KU150 should never be substituted with other brand catalysts.

## FLOW EXEMPT CATALYST (KU151)

This product must be pre-mixed with other products before use. KU151 is a multi-purpose catalyst for urethane finishes, designed for high temperatures, humid conditions, and improves the flow.

## REDUCERS (RU310 - RU313 & RU300 VOC EXEMPT)

Our Kosmic Reducers - RU310 Fast Dry, RU311 Medium Dry, RU312 Slow Dry, RU313 Very Slow Dry and RU300 VOC exempt (Fast to Medium) - are the only reducers we recommend for use with our House of Kolor® System.

## RETARDER (RU315)

Designed for the Kosmic Kolor® Urethane system to retard dry time in situations where this is deemed necessary, such as force drying. May be added to faster reducers to slow their dry time in emergency situations.

## KRATOR ELIMINATOR (KE170)

An additive that corrects fisheye or crater defects. Works with lacquer, urethane, polyurethane, acrylic urethane, acrylic enamel, and other polymer coatings. A must have product for your paint shop.  
**CAUTION:** MAY NOT CORRECT MAJOR SILICONE CONTAMINATION.

# DRY PEARLS & FLAKES

## PEARL CONCENTRATES (DR & DP SERIES)

*‘Hybrid color morphing accents’*

Our specially developed Pearl concentrates are available in dry form. Add to any of HOK acrylic lacquers or urethane enamels, Intercoat Clear, Intercoat Pearl or Flake Karrier to morph your project into a truly hybrid creation.

## KOSMIC PEARL (KDP SERIES)

Kosmic Pearls are our newest pearl line that features increased reflectivity, brightness and sparkle. Kosmic Pearls feature high intensity making them a great choice to use over light or dark bases. Try adding Kosmic Pearl in dry form to your clear finish for a dramatic effect.

- View in sunlight for optimum effect
- Small quantity goes a real long way

## KAMELEON OPAL (KOP SERIES)

Kameleon Opals represent some of the latest advancements in pearlescent and flake technology. These new advancements allow radical color change from different viewing angles. Available as easy dispersing powders that can be added to our range of Clears, Pearl Basecoats and Marblizer to create dazzling effects & exciting new colors. Available in 4 amazing colors sure to add exciting new effect to your kustom coatings palette.

## KAMELEON PEARL (KPF SERIES)

Kameleon Pearls are at the edge of technological advances, offering unique color changing pigments. Kameleon will actually change color depending on what angle it is viewed. Rounded, curved surfaces & sharp angles will be highlighted by this unique formulation. Supplied in dry form, they can be added to a selection of HOK Clears & Karriers.

## ICE PEARL II (IPII SERIES)

Ice Pearls surpass all traditional pearls for brightness of color, transparency and reflectivity. This lies in the glass flake pigment technology that is further accentuated in sunny conditions. Furthermore, blending Ice Pearl pigments will give a truly multi-color effect – showing each of the colors combined in the pearl. Ice Pearl may be used in conjunction with any of our Shimrin Universal bases, Kandys, Klears, Marblizers or Kustom Bases.

## KOSMIC LONG-GLO (KLG SERIES)

*‘Fun with the lights off’*

Kosmic Long-Glo is a glow in the dark powder additive that can be mixed into any base or Klear. For exceptional results it is recommended that Long-Glo is applied over a white base. Kosmic Long-Glo is fantastic for use in airbrushing & detailing – to add another dimension to your project at night. As with all glow in the dark products, Kosmic Long-Glo has a limited color fastness in the direct sun, so an overall project is not recommended.

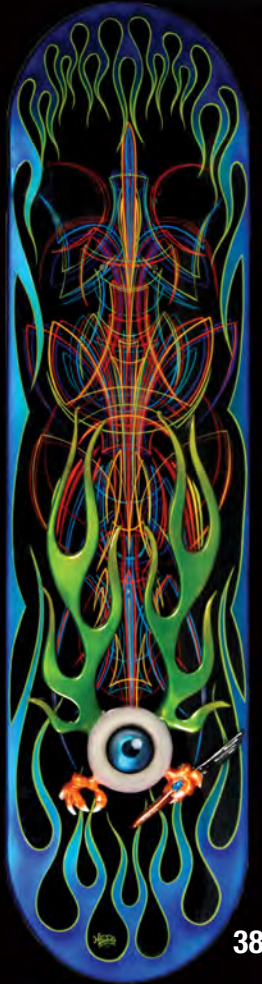

- Use for small parts, graphics for a one-off cool look!
- Carrier for smaller flakes and pearls

## Flakes (F, MF & UMF SERIES)

*‘A galaxy of sparkle to inspire you’*

Unlike the majority of flakes on the market that claim to be easy to spray – ours really are! Ultra thin polyester makes HOK Flakes the lightest and easy to use. We have a generous variety of colors – even Kameleon color shift flakes. HOK Flakes are available in 5 flake sizes to create any look or finish. A great retro look can be created using a chunky flake over a contrasting Kandy Basecoat for real head-turning appeal. Or for a subtle shimmer of flake – try Translucent Flakes that allow more of your base coat to shine through the flake particle.

- Flakes can be added to any of the HOK SG Karriers and Klears

SPECIALTY PRODUCTS

ADHERETO® (AP01)

AP01 is designed to use when top coating Polypropylene, TPO (Thermoplastic Polypropylene), Polypropylene/elastomer blends, other plastics, aluminum, steel, brass and other metals. Adhereto® creates a bond between a substrate and a coating, or between a dried coating and a fresh (wet) one. This product is also useful when sanding situations are difficult. Adhereto® is easy to use and dries in minutes. Ready to spray right out of the can (no reduction required). Product is clear in color.

HI-HEAT BLACK (HH04)

Hi-Heat Black is a fast-covering, great-looking, semi-gloss jet black finish that will endure 1400° F without flaking or discoloration. It is a great coating for engine parts or exhaust systems on cars, trucks, motorcycles, small engines, etc., where high temperatures are a concern. Hi-Heat Black comes ready-to-spray with no reduction required. Coated parts are dry enough to handle in one hour without baking.

KOSMIC KONVERTOR (KV1)

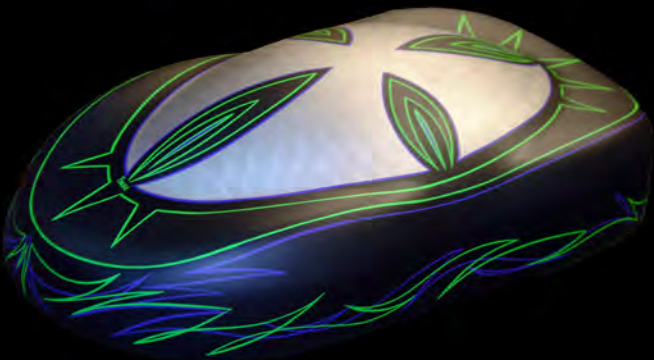

- Konverts all House of Kolor basecoats to 3.5 lbs. VOC or less
- Improves pearl and metallic control
- Allows you to use your pre-existing materials and equipment
- Meets all California VOC regulations, as part of the House of Kolor system

FLATTENING AGENT (FA01)

Flattening Agent reduces the gloss of our polyurethane enamel topcoats and Klears. Flattening Agent will not affect adhesion or hardness. It is great for under carriages, frames and engine parts where you need a tough, durable finish and low gloss.

KOSMIC KANDY KARRIER (UC25)

- Designed for use as an effective karrier for our Kandy Koncentrates
- Medium solid binder with the same application properties as our Urethane Kandy's
- Excellent clarity, weathering, and ultraviolet resistance
- Meets all California VOC regulations, when used in the House of Kolor system

STRIPING AND LETTERING  
STRIPING & LETTERING ENAMEL (U SERIES)  
'For a truly unique custom job'

Designed for striping, lettering & airbrush artwork. The high pigment concentration means you can complete most strokes with one pass – single application! Low film build for minimal edging. For a unique retro or rat rod look – this is perfect to transform your project into a one-off. Available in 28 accent colors to highlight your project.

- Apply over existing finishes or topcoat with clear for a smooth durable finish
- Can be catalyzed when topcoat clear isn't required

MATERIAL USAGE GUIDE

Approximate materials needed for a complete paint job. Quantities may vary from painter to painter and articles to be sprayed, etc. This chart is an approximate only.

URETHANE ENAMEL FINISH

		Motorcycle (tank & fenders)	Small to Average Auto	Van or Full-Size Truck
Primer	KP2CF Primer	2 quart Kit	2 gallon Kit	2 gallon Kit
Low VOC Primer:	KD2000 Low VOC Primer	1 quart Kit	1 gallon Kit	1 gallon Kit
Ground Coat:	Ko-Seal® II **	1 quart	2 quarts	3 quarts
(choose one)	BC25 Black or BC26 White	1 quart	1 gallon	6 quarts

NOTE: Neons require BC26 White or KS10 White for Ground Coat

Top Coats &	UB04 or UFB04 Jet Set Black **	1 quart	4 quarts	6 - 8 quarts
Base Coats	UB05 or UFB05 Brite White **	1 quart	4 quarts	6 - 8 quarts
(choose one)	UFB06 Kosmos Red **	1 quart	4 quarts	6 - 8 quarts
Shimrin® Universal Bases:	Designer Pearls (PBC)	1 - 2 quarts	6 quarts	8 - 10 quarts
	Graphic Kolors (SG)	1 - 2 quarts	6 quarts	8 - 10 quarts
	Neons (NE)	1 - 2 quarts	6 quarts	8 - 10 quarts
	Metallics (BC or FBC)	1 - 2 quarts	5 - 6 quarts	8 quarts
	Metajuls™ (MBC)	1 - 2 quarts	4 - 5 quarts	8 quarts
	Universal Pearls (PC)	1 - 2 quarts	6 - 8 quarts	8 quarts
	Marblizer® (MB)	1 quart	2 quarts	2 - 3 quarts
	Kandy Basecoats (KBC)	1 - 2 quarts	6 quarts	8 - 10 quarts
	Kameleon® (KF)	1 quart	3 quarts	4 quarts

Note: Marblizer® requires a Base Coat. See instructions.

Kandy:	Kosmic Kandy (UK) **	1 - 2 quarts	4 - 6 quarts	2 gallons
(optional)	Kandy Koncentrate (KK)	8 oz. of Koncentrate plus 2 quarts clear = 2 quarts Kandy		

Note: Kandy Koncentrate requires additional clear. See instructions.

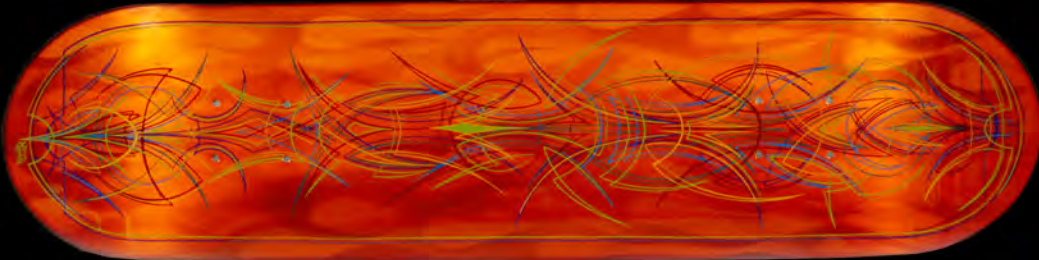

Clear Coat:	UC35 Kosmic Acrylic Urethane Klear **	1 - 2 quarts	3 - 4 quarts	6 quarts
	UFC35 Kosmic Urethane Flo-Klear **	1 - 2 quarts	3 - 4 quarts	6 quarts
	UCC01 Kosmic Acrylic Urethane Kustom Klear **	1 - 2 quarts	3 - 4 quarts	6 quarts

NOTE: UB04, UB05, UFB04, UFB05, and UFB06 DO NOT require a Clear Coat.

NOTE: If artwork is planned over Shimrin® Pearl or Metallic Bases, add 1-2 quarts of SG100 Intercoat Clear. See instructions.

Reducer:	Kosmic Reducer	1 - 2 gallons reducer per 2 gallons of paint		
Components:	Catalyst	1 pint per quart of paint (required only with products whose code begins with "U") (KS Ko-Seal® II requires 1/2 pint per quart)		

\*\* Requires Catalyst
