TGX

The New TGX Vision double action gravity feed airbrush will be ready to ship in April of 2014. The TGX is a Talon series airbrush with the following upgrades. It will come installed with our new .2mm head, hand polished hardened stainless steel needle, Sloped trigger, air atomization control and the black chrome plating. Starting out it will be offered as the airbrush less accessories as well as packed in our new aluminum case that will also include the size 3 head and fan aircap. Pricing and Pictures should be available in late February or March.

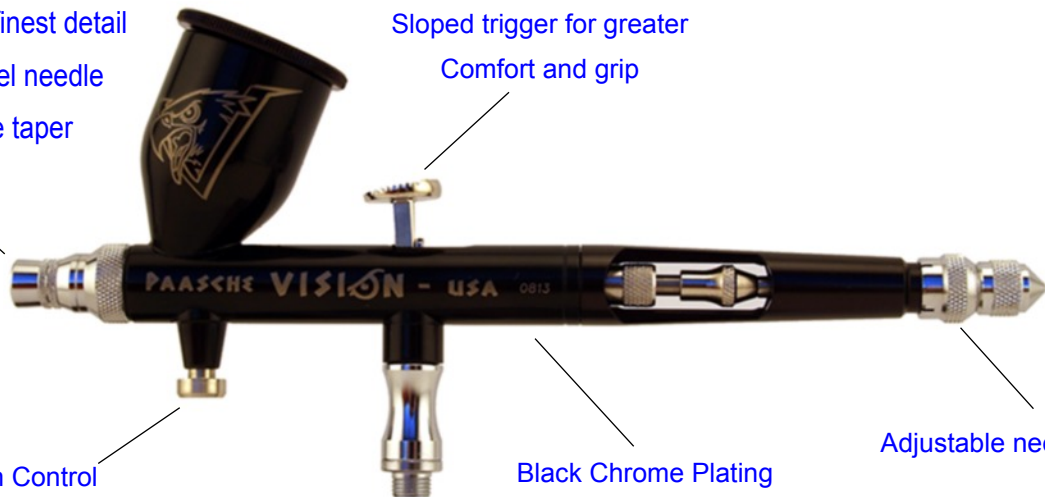

New .2 mm Head for the finest detail
New harder stainless steel needle
with hand polished needle taper

Sloped trigger for greater
Comfort and grip

Air Atomization Control

Black Chrome Plating

Adjustable needle Stop

The combination of the .2mm tip and hand polished stainless steel needle results in amazing detail and less clogging.

Best of all the standard .25, .38 and .66 head as well as the fan aircap are compatible with the TGX airbrush.
